

MWI

Carbon & Graphite Solutions

Dynamic Filtration EDM Filters

Dynamic Filtration offers the highest quality filters plus the longest lasting EDM filters in the industry. With the most extensive product line and seamless integration across top EDM manufacturers, MWI, Inc. has what you need!

Product Features

The widest array of EDM filters in the industry

Superior deionized water cleanliness and longer life performance

Excellent quality control processes resulting in superior quality levels

Most of the filters have the highest square footage of filter media in the industry

Products using plastics that offer longterm resistance to deterioration in water and oil

Dynamic Filters Help Provide Overall Value to Your EDM Operation

The utilization of high quality media, along with the most durable steel and plastics currently available, characterizes Dynamic Filtration. Its distinctive pleated configuration contributes to the optimal capture of particles within the dielectric fluid, thereby enhancing the longevity of EDM machines. Additionally, this design minimizes downtime and lowers maintenance expenditures.

EDM Filters For Sinker & Wire Machines

Widest Range Offered in the Industry

All Machine Types Covered

Various Micron Levels Offered

Cost Effective and Long-Life Solutions

Corrosion Resistant Metal or Plastic Baskets
